Fold on dotted line and display top portion in elevator.

- The safety test was performed under the rated load.
- Landing entrances are guarded, locked and unlocked from the hoistway side only.
- Landing call buttons are not operable unless the hoistway door-locking devices are installed and operative.
- A notice is posted at each entrance stating the equipment has not been finally accepted.

I certify the elevator complies with the requirements found in Iowa Administrative Code Sections 72.23(89A), with ASME A17.1, Section 5.10, and the elevator will be used for construction materials or construction personnel only and no passengers.
